A LIST OF SPELLING DIFFERENCES BETWEEN KOINE AND EGYPTIAN GREEK VERBS

Leslie McFall
30 December 2014

The purpose of this list was to collect examples where Koine verbs were replaced in the NA28/Egyptian text without changing the meaning. The sole criterion was that the verb root, should be the same, along with the same tense, voice, mood, person, number, and case. The object was to eliminate any factor that would change the meaning of the Koine verb.
To date no scholar has put forward the possibility that the Egyptian text, as represented by the Nestle-Aland text, and the Koine text, as represented by the Robinson-Pierpont text, could represent two, very closely related Greek dialects. If there is a dialect difference between the Koine and the Egyptian texts this list should provide some of the data for it.

The readings for the NA28th text were obtained from the *Accordance* programme. There is no equivalent programme available for the RP text. The raw data was assembled using Jack A. Moorman's book, *8,000 Differences Between the N.T. Greek Words of the King James Bible and Modern Versiuons* (New Jersey: The Bible for Today/The Dean Burgon Society, 2006). This book was produced using George Curry's computer-generated comparison between Scrivener's Greek text and the Nestle-Aland Greek text (27th edition).
Unfortunately, there are a number of readings in Scrivener's text that are no longer regarded as belonging to the Majority Text. Care has been taken to eliminate these in this list.

The parsing is in the order of Tense, Voice, Mood, Person, Number, Gender, and Case.
TENSE: P = Present, I = Imperfect, F = Future, A = Aorist, R = Perfect, 1A = 1st aorist; 2A = 2nd aorist, etc.
VOICE: A = Active, M = Middle, P = Passive, E = Either middle or passive.
MOOD: I = Indicative, S = Subjunctive, O = Optative, M = Imperative, N = Infinitive, P = Participle.
PERSON: first (1), second (2), and third (3) person.
NUMBER: S = Singular, P = Plural.
CASE: N = Nominative, G = Genitive, D = Dative, A = Accusative, and V = Vocative.
The Bible books are abbreviated to three letters and digets.
The SIGLA is best explained by examining a couple of examples. In the column for the Egyptian reading, the line reads:

Reference	Parsed	KOINE	EGYPTIAN
MK 09:22	PMI2S	δυνασαι {2x}	δυνη (2 out of 2x) + Mk 9:23

Under the EGYPTIAN column "δυνη (2 out of 2x)" means that δυνη occurs two times in the NA28 text, and these replace the KOINE δυνασαι twice {2x}. This layout does not tell us the total times that δυνη occurs in the RP text. The estimated KOINE total is placed inside curly brackets, e.g., {2x} in the above example.
Another example:

Reference	Parsed	KOINE	EGYPTIAN
REV 02:04	AAI2S	αφηκας*	αφηκες (1x)

Under KOINE is αφηκας. It is followed by an asterisk, which indicates that this form does not not appear anywhere in the NA28th edition of the Greek N.T. Under the EGYPTIAN column is αφηκες, followed by the number of times αφηκες replaces αφηκας.

Horizontal lines are for convenience only to bring related lines together.

Reference	Parsed	KOINE	EGYPTIAN
REV 02:04	AAI2S	αφηκας*	αφηκες (1x)
LK 11:04	PAI1P	αφιεμεν*	αφιομεν (1x)
MT 25:32	FAI3S	αφοριει*	αφορισει (1x)

The LXX has MT αφηκας 4x (Tob 11:2; Ps 31:5; 84:3; Sir 27:19), but none of αφηκες.

The LXX has only αφιουσιν (1 Esdr 4:7), which is analagous with the NA text. LXX has one
      direct parallel with MT with αφιεμεν (at 1 Mac 13:19).

The LXX has a direct parallel with the MT αφοριει (13x: Lev 13:4, 5, 11, 21, 26, 31, 33, 50, 54;
      14:12; Isa 56:3), but none with NA.

_____

| LK 17:04 | AAS3S | αμαρτη 2A {2x} | αμαρτηση (1 out of 2x) + 1 Jn 2:1 |

The LXX has 20 direct hits with MT αμαρτη. LXX has no parallel to NA αμαρτηση.

_____

| REV 11:12 | AAM2P | αναβητε 2A {2x} | αναβατε (1x) + Jn 7:8 |

The LXX has 18 direct hits with MT, but none with NA.

_____

ACT 10:39	AAI3P	ανειλον*	ανειλαν 2A (1x)
ACT 02:23	AAI2P	ανειλετε*	ανειλατε 2A (1x)
ACT 07:21	AMI3S	ανειλετο*	ανειλατο 2A (1x)

The LXX has 6 direct hits with MT ανειλον, and none with NA.

The LXX has no direct hits with MT ανειλετε, but none with NA.

The LXX has no direct hits with MT ανειλετο, but one with NA (Exod 2:5).

_____

| MK 06:40 | AAI3P | ανεπεσον {2x} | ανεπεσαν 2A (2 out of 2x) + JN 6:10 |

The LXX has one direct hit (1 Mac 1:11) with NA ανεπεσαν, and none with MT.

_____

| ACT 18:14 | AMI1S | ηνεσχομην* | ανεσχομην 2A (1x) |
| LK 02:16 | AAI3P | ανευρον* | ανευραν 2A (1x) |

The LXX has no direct hits with MT ηνεσχομην and none with NA.

The LXX has no direct hits with MT ηνεσχομην and none with NA.

[1] These 32 cases should have been changed by the Egyptian editor into ειπαν. Their retention shows that the Egyptian editor was familiar with the Palestinian (Koine) conventions of writing Greek literature. It also reveals that the Egyptian recension, once made, did not undergo another revision. Any change to these 32 'exceptions' would have been made by individual Egyptian copyists.

[2] 'Yes' means that the substitution is correct as regards the manuscript evidence. 'Split' means that Vaticanus and Sinaiticus do not agree on the substitution, and one or the other will support the Koine reading.

[5] It is highly unlikely that the Palestinian Koine used επεσαν. The Palestinian Koine form

HEB 11:30 AAI3P επεσον* 1A επεσαν 2A

The LXX has 39 hits for MT επεσον, and 27 hits for NA επεσαν.

The verb επεσον occurs in Gen, Num (ch. 17), Judg (2x, chaps 9, 13), 1 Chr (5x), 2 Chr (4x, chaps 7, 13, 14, 29), Judith (2x), Tob, 1 Mac (19x), Ps (ch. 35), Ezek (2x, chaps 23, 27) = 39 total.

The verb επεσαν occurs in EXOD, LEV, Num (2x, chap 16, 20), Judg (2x; chap 12, 20), 1 Sam (2x), 2 Sam (6x), 2 Chr (1x = 20:18), 1 Mac (2x, chap 4 [2x]), Ps (3x, chaps 19, 26, 77), Sir (2x), Hos, Jer, Ezek (2x, chap 31, 39).

CONCLUSION: The cases are too mixed, and too random, to spot any criterion. See Judges, 2 Chron., 1 Mac., Pss, Ezek (though Ezek was written by two Gk scribes).
